REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

None of the prior art references teach or suggest taking the by-product glycerine tri-low carbon carboxylic ester, from the first transesterification process, and using as a reactant in a second and different transesterification process to make a low carbon fatty acid ester that is recycled back into the first transesterification for use as the reactant in the continuous process for the production of biodiesel.

The closest prior art, Mukherjee, K.D. et al., related to the first transesterification reaction, however, it does not teach step 2 of the claimed process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
